

PROTECT FRAGILE OBJECTS ECO LOGIC

FREE SERVICE : ASSISTANCE FOR THE PROTECTION OF FRAGILE ITEMS TO BE RESPECTED IN ORDER TO PROPERLY PROTECT THE ITEMS AND SHIP YOUR PACKAGES WITHOUT BREAKAGE - BUY AND SELL WITH CONFIDENCE

SUPER SECURITY PROTECTION: SUSTAINABLE AND VERY EFFECTIVE CONCEPT CREATED BY ECOPROFITABLE.COM (INNOVATIVE AND ECO-FUTURISTIC PROCESS)

1 – INTRODUCTION: PRESENTATION

2 – PROCEDURE: HOW TO DO IT (READ PAGE 3)

3 – RECOVERY OF PROTECTIVE EQUIPMENT (READ PAGE 5)

4 – FREE COURSES (EFFECTIVE CONCEPT VALIDATED BY ACTIONS): PUT INTO PRACTICE TO OVERCOME PREJUDICES OR POOR IMPLEMENTATION OF OUR ADVICE (READ PAGE 5)

5 – SELL: EASILY DEFINE THE WEIGHT OF THE DISHES (READ PAGE 6)

1 – INTRODUCTION:

Tableware is often shipped to satisfy international trade. So well protected, we should not worry about delivery.

THIS GUIDE IS USEFUL FOR BOTH THE BUYER AND THE SELLER. TO PREVENT YOUR FRAGILE GOODS FROM BREAKING DURING THE JOURNEY (E.G. BY TRAIN, BUS, CAR, SHIPPING OR HAND DELIVERY ETC.), WE PROPERLY SECURE YOUR ITEMS. NOT FORGETTING THAT SOMETIMES DELIVERY REPRESENTS ON AVERAGE A CAR JOURNEY (THE PRICE OF FUEL); OR THE PRICE OF BUS TICKETS, METRO ETC. WHEN HANDED OVER IN PERSON. RECEIVE YOUR ORDER AT HOME AND SAVE TIME AND MONEY FOR YOUR ENTERTAINMENT.

HAND DELIVERY BY APPOINTMENT WITH THE SELLER:

BUYERS: Don't forget that you can also collect your order in person by appointment with the seller. In this case, you must take precautions to collect your items. You can use this protection guide when needed (and be careful while traveling). If you need advice, we can help you. Just contact us.

SELLERS: Please note that you are not forced to do all of this and can opt for hand delivery when publishing your ads. So you don't have to weigh your dishes (because there are no delivery costs). You will therefore not have to protect fragile dishes. In this case, this guide does not apply to you. But this restricts the interest of your ad to your neighborhood (or city) and therefore greatly reduces the number of customers likely to be interested.

In order to fully understand this guide, we invite you to participate in the free practical lessons. So you will have a realistic idea thanks to our coaching, assistance to do it correctly. This is to avoid protection errors linked to misunderstanding of our advice). This is why we systematically contact each seller on this subject when their sale is concluded.

Be aware that all the **EFFECTIVE PROTECTION MATERIAL** that we advise you to use (boxes, fabric, bottles etc.) is not heavy and will not weigh down your package. In addition, it helps to fight against pollution.

We advise you to contact us to successfully protect your items. And we will contact each seller about it to make sure the procedure is followed and respected.

"ECO LOGIC" procedure by making maximum use of what no longer serves you. For protective equipment : consider using what you no longer need or seize opportunities. if you have to buy them new, buy recycled items when you can (ask sellers)

THESE PROTECTION TECHNIQUES ARE ALSO VERY ECONOMICAL AND RELIABLE

After reading this document, you must certainly ask yourself why we do not simply use bubble wrap intended for this purpose. And why use sopalin, newspaper, fabric, clothes, box with lid etc.

WE WANT CUSTOMERS TO BE DELIVERED WITHOUT HAVING ANY PROBLEMS, WHICH IS WHY WE TAKE MAXIMUM PRECAUTIONS (because bubble wrap may not be enough in some cases). Not to mention that the resistance of bubble wrap varies between brands (even if you use large bubbles). This poses an efficiency problem. So this device must be strengthened to guarantee flawless deliveries. Hence these tips to remedy this, and not have bad surprises. And the goal is to prove to customers that they can protect their objects at a lower cost with different very simple methods and in an eco-responsible way.

To reduce costs for bubble wrap where for small orders of small items it would not be profitable to buy a lot (eg cups, mugs etc.) And also to strengthen the protection of objects we recommend that you use newspaper and fabric (effective anti-shock). This allows you to use less bubble wrap. And even sometimes to do without, while having well protected the articles. And with this technique you can use the cheapest bubble wrap for your shipments.

Indeed, there is different kinds of bubble wrap. The one with small bubbles (the cheapest) and the one with big bubbles more expensive. So to avoid any misunderstanding because not everyone is an expert in bubble wrap, we have put in place these techniques so as not to worry about it. And even use small bubble wrap (the cheapest for all your shipments if needed).

THE OBJECTIVE OF ALL THIS IS ALSO TO FIGHT AGAINST POLLUTION BY USING LESS BUBBLE WRAP. THIS IS ALSO WHY YOU ARE ASKED TO SELL AND BUY YOUR PROTECTIVE EQUIPMENT ON THE SITE. SO IT CAN BE USED BY SEVERAL PEOPLE.

The solid box with lid allows you to consolidate and further strengthen your packaging. Thus in the event of a problem with the cardboard, shocks will be avoided. We want customers to be delivered without having any problems, which is why we take maximum precautions.

AND ALL THIS USED EQUIPMENT (SECOND HAND), IT'S NOT AT ALL EXPENSIVE (EX BOX WITH LID, FABRIC, CLOTHING, SHEET, CURTAIN ETC). OR EVEN OFTEN YOU HAVE SOME AT HOME THAT NO LONGER SERVE YOU. AND IF YOU HAVE NO CHOICE AND HAVE TO BUY IT NEW, IT'S STILL NOT EXPENSIVE. THE BEST IS TO TAKE IT USED FOR THE ENVIRONMENT.

Afterwards, problems may still arise (as with all goods purchased online or even in store) but this will not be our fault but linked to the delivery company. And it is still very rare. We also minimize this kind of risk by using reputable delivery companies. We still want to make this clear to you because it's the same for everything, there is always a risk. But in most cases everything is fine.

WE ARE TALKING ABOUT A VERY RELIABLE, VERY EFFICIENT SERVICE WHEN THE RISK IS ALMOST ZERO, almost equal to 0 (that is, the probability of this happening is very low). WHICH IS THE CASE FOR OUR PROTECTION SYSTEM.

This is why we do our business otherwise it would be impossible if we were not able to ship your orders to you with maximum guarantees that they will be delivered to you correctly. And all the delivery companies would have already gone bankrupt, but this is not the case at all. Which proves that these difficulties are very rare.

AFTER ALL THESE PRECISIONS YOU CAN NOW DISCOVER WHAT WE OFFER YOU TO HAGGLE WITHOUT STRESS

Prepare your packages without being stressed by protecting your fragile items because it is very easy, efficient and it does not cost much. Mandatory process to be followed to satisfy buyers.

To solve this problem I have implemented several effective strategies and the international tableware trade has reinforced my approach. I assure you that this panic is useless and you will understand why.

Stop stress related to the protection of fragile objects. With us you will never think about it and have fun preparing packages. You will be able to make your purchases and sales with serenity.

With the technique we can easily protect fragile objects (even full services).

Tableware is sold everywhere and luxury brands have international boutiques due to their success. Because, they care about quality and style by using noble materials to satisfy their demanding customers. **So these items are often shipped to meet international orders. Ditto in France when stores order their stocks.**

This proves that if you protect them well there is no damage and you don't have to worry about the delivery.

Free service: assistance with protecting fragile items. We advise you to contact us to successfully protect your objects. And we will contact each seller on this subject (after the sale of the goods) to ensure that the procedure is respected and carried out well.

2 – PROCEDURE:

Protecting a fragile object can seem difficult, but it is very easy, efficient and inexpensive. All you need to do is strictly follow the following mandatory tips to prepare your packages and ship them without breakage and thus fulfill buyers' orders. **THESE ARE ONLY EXAMPLES AND OTHER ADVICE CAN BE GIVEN TO YOU. If you are missing things, there is always a way to do otherwise with our coach (and not on your own initiative without approval from us).** Your participation is of course welcome. If you have any thoughts on this, let us know. But you still need to have our validation.

PAPER + FABRIC + SOLID BOX WITH LID (FOR SMALL OBJECTS OF THE SAME SIZE AS TEA CUPS)

Wrap each object in paper (e.g. newspaper, envelopes, packaging sleeves, sheets of wrapping paper, etc.). Add enough.

Then wrap everything in something thicker, like fabric (e.g.: small towel, small sheet, small curtain, small items of clothing that you no longer need, etc.). Effective shock absorbers.

Secure by putting everything in a solid box (plastic, wood or other) and close the lid tightly, tape to consolidate everything.

Take a box in the size of your items to prevent them from moving during transport.

Finally, place everything in a box that is not too large compared to the contents to prevent it from moving during transport. Or just reformat it yourself to the size you want.

WITH BUBBLE WRAP + SOLID BOX WITH LID

Wrap each object in paper (e.g. newspaper, envelopes, packaging sleeves, sheets of wrapping paper, etc.). Add enough.

Use bubble wrap + fabric (only if the bubble wrap is not thick enough – with small bubbles). You must use both for large objects (fabric and bubble wrap).

Secure by putting everything in a solid box (plastic, wood or other) and close the lid tightly, tape to consolidate everything. Take a box in the size of your items to prevent them from moving during transport.

Finally, place everything in a box that is not too large compared to the contents to prevent it from moving during transport. Or just reformat it to the desired size yourself.

FOR BIG ORDERS AND COMPLETE SERVICES : USE A STURDY BOX WITH LID + BUBBLE PAPER + FABRIC

Wrap each object with paper (e.g. newspaper, graft paper, envelopes, packaging pouches, honeycomb paper, sheets of wrapping paper, foam tape or film, etc.). Add enough.

Then wrap each object with small bubble wrap

Then wrap everything in something thicker, like fabric (e.g. towel, sheet, curtain, duvet, clothes that you no longer need, pillow, etc.). Effective shock absorbers.

Secure by putting everything in a solid box (plastic, wood or other) and close the lid tightly, tape to consolidate everything. Take a box in the size of your items to prevent them from moving during transport.

PS: if the fabric you are using is very large, you can put it around the plastic box once closed (and not inside due to lack of space e.g. duvet, curtain, coat, etc.).

Finally, place everything in a box that is not too large compared to the contents to prevent it from moving during transport. Or just reformat it to the desired size yourself.

ATTENTION : when we talk about a solid box (plastic, wood or others) : it is a box that does not deform at the slightest blow. For plastic boxes, remember to close the lid to test if they are resistant to shocks. If after closing it becomes deformed then it is not strong enough so it should not be used for protection.

SOLID PLASTIC BOTTLES WITH CAPS (FOR SMALL OBJECTS OF THE SAME SIZE AS TEA CUPS)

If you have sturdy plastic bottles you can also use them as a shock absorber (placing them all around your object with tape, not forgetting to put paper with small bubbles or fabric). Remember to close the bottles with their caps. When they are solid, when closed and stay very hard and do not warp. If your bottles become deformed with the corks, they are not solid so they should not be used for protection. Finally, slip everything into a carton (cardboard).

TIN CANS (FOR SMALL OBJECTS, EXAMPLES: GLASSES, CUPS, ETC.)

Wrap the object with paper (e.g. newspaper, envelopes, packaging sleeves, sheets of wrapping paper, etc.). Add enough.

Then put the item in the can. Secure the object in the can with paper or something else to prevent it from moving. Finally, place everything in a box that is not too large compared to the contents to prevent it from moving during transport. Or just reformat it to the desired size yourself..

IF YOU RESPECT ALL THESE ADVICE

BY PUTTING ENOUGH PAPER AND FABRIC

PROPERLY USING THE SOLID BOXES + COVERS

AND HARD BOTTLES WITH CAPS

YOUR PACKAGES WILL TRAVEL IN SECURITY WITHOUT BREAKAGE

CONSULT THE “CLIC INFO” SECTION OF THE SITE WITH THE DELIVERY RATES

Also remember to take out insurance in case of loss of the package (strongly recommended for items that are expensive so you will be reimbursed by the carrier in the event of loss of the package).

Ask for secure delivery methods such as La Poste, UPS etc. For Mondial Relay, consider securing your package by necessarily using a sturdy box with a lid, bubble wrap and fabric for all your shipments.

Remember to give the buyer the tracking number of the parcel to avoid any misunderstanding.

3 – RECOVERY OF PROTECTIVE EQUIPMENT

Be aware that all the EFFECTIVE PROTECTION MATERIAL that we advise you to use (boxes, fabric, bottles etc.) is not heavy and will not weigh down your package. In addition, it helps to fight against pollution.

PS: IF YOU WANT TO RECOVER YOUR PROTECTIONS (e.g. fabric, clothing, duvet, sheet, coat, curtain, sturdy box with lid, etc.), simply ask the buyer to send them back to you at your expense (this does not expensive, think about the relay point). Using large fabric allows you to secure large orders quickly and easily. So this idea of recovering protections can be very interesting for this. **You can therefore use what you have at home (without having to buy equipment).** Or grab second hands, if needed for all your shipments (it's not expensive). It's good for the environment. It is also for these reasons that you are asked to sell protective equipment on the site.

RECOVERY ECOPROFITABLE.COM

When you purchase items shipped by ECOPROFITABLE, we ask sellers to ship the protective materials back to us at our expense. Or if necessary, to put this material for sale on the site on our behalf (we are the ones who take care of publishing the ad). And if it really poses a problem we offer it to you. **But we will do our best to recover this material, especially for the environment.**

YOU CAN ALSO SELL AND BUY YOUR PROTECTION ON THE SITE : boxes with lids, bubble wrap ... (re-use to fight against pollution). Some items can also be used for something else so we will find them in several sections on the site (eg boxes for storage)

Also remember to take out insurance in case of loss of the package (strongly recommended for items that are expensive so you will be reimbursed by the carrier in the event of loss of the package).

CONSULT THE “CLIC INFO” SECTION OF THE SITE WITH THE DELIVERY RATES

Ask for secure delivery methods such as La Poste, UPS etc. For Mondial Relay, consider securing your package by necessarily using a sturdy box with a lid, bubble wrap and fabric for all your shipments. **Remember to give the buyer the tracking number of the parcel to avoid any misunderstanding.**

4 – FREE COURSES (EFFECTIVE CONCEPT VALIDATED BY ACTS): PUT INTO PRACTICE TO OVERCOME PREJUDICES OR BAD ACHIEVEMENTS OF OUR ADVICE

NOTHING BETTER THAN ACTS TO VALIDATE A PROCEDURE

To fully understand this guide, we invite you to participate in the free practical lessons (even before the sale of your items). This way you will have a realistic idea. This is to definitively put an end to certain reluctance and prejudices which could persist despite reading this document designed to put an end to your anxieties.

And even if you try these tips yourself, if you do it wrong, it won't work. Hence the implementation of free courses: coaching, assistance and mandatory after the sale of the items to ensure that it is done correctly (with verification).

PS it's not complicated, it's very easy and simple but you just have to learn how to do it well.

It's a bit like pancake batter, overcooked pasta etc.

You just have to master the puzzle of protective equipment. It's real child's play!

One of the major challenges of our activity was to overcome this obstacle: to deliver your fragile tableware to you without breakage and above all in an eco-responsible manner. And we succeeded! otherwise it would be impossible for us to carry out our activity (we would have given up from the start) if we were not able to ship orders (especially large orders). But we already did it!

We offer group sessions. And for sellers of the site individual courses to protect their merchandise for sale.

To register, contact us directly.

5 – SELL: EASILY DEFINE THE WEIGHT OF THE GOODS

Only concerns orders to be shipped (and not delivered by hand). PLEASE KNOW THAT YOU ARE NOT FORCED TO DO ALL THIS AND CAN OPT FOR HAND DELIVERY. SO YOU DON'T HAVE TO WEIGH YOUR DISHES (BECAUSE NO DELIVERY COSTS). SO YOU WILL NOT HAVE TO PROTECT FRAGILE DISHES. But this restricts the interest of your ad to your neighborhood (or city) and therefore greatly reduces the number of customers likely to be interested.

When publishing your ads for free on the site:

TO DEFINE THE WEIGHT WE OFFER YOU 2 SOLUTIONS

1 – DEFINE THE WEIGHT WITH ESTIMATES (we will do it)

You just need to tell us the total weight OF YOUR DISHES (without protection). If you don't know, go to the post office to weigh your merchandise to get the weight.

Then we will take care of defining the delivery price with item protection (which we will also define with estimates and reimburse the buyer in the event of an overestimate). So you don't have to protect your dishes and can quickly go to the post office to weigh your goods. THIS IS WHY YOU MUST INDICATE THE TOTAL WEIGHT OF THE DISHES (or appliances, etc.). Otherwise, this will distort our estimates and the order will be canceled (unless you agree to pay the additional cost). So specify the weight of the dishes.

2 – DEFINE THE ACTUAL WEIGHT

You can attend our item protection courses before your merchandise is sold. So you can weigh the dishes already protected and will have precise delivery prices, with no surprises. We will take care of providing you with these prices. Just tell us the weight of your dishes with the protection. You should know that you will be required to take part in this course to ship your items when the sale is concluded (we will always contact you to assist you and verify that it is done correctly).

SELLERS OUTSIDE FRANCE: We will not be able to define delivery rates for you but will be able to assist you with weight estimates. So whatever your choice among the 2 solutions proposed, it is up to you to indicate the prices according to the different delivery companies in your country. If you would like us to do this for you, you will need to provide us with all the pricing information.

IF YOU DO NOT HAVE CERTAIN INFORMATION (E.G. WEIGHT OF THE DISHES), THIS DOES NOT PREVENT YOU FROM CONTINUING TO EDIT YOUR ADS. Don't forget that you can prepare your ads and modify them whenever it suits you to add information. We will only publish your articles when we have all the desired information. And we will contact you if necessary.

WEIGH LARGE QUANTITIES OF DISHES EASILY: You can weigh one item of each “feature”. If you have several different items, weigh 1 or 2 of each size.

Then do the addition to define the total weight of the large batch of dishes. So you don't have to go to the post office with all the merchandise because it can be heavy.

Example for a service of 36 plates with: 12 dinner plates, 12 soup plates, 12 dessert plates

To weigh at the post office: just take 2 dinner plates, 2 soup plates and 2 dessert plates

Find the weight of the 6 plates and multiply it by 6 = the total weight of the 36 plates

PLEASE NOTE: if necessary, you will need to make 2 packages because your merchandise must not exceed 30kg for shipping by post. We will notify you (because we will have to take it into account to estimate or define your delivery costs)

AND IF YOU HAVE A LOT OF DISHES (SEVERAL LARGE SERVICES), we will find other solutions to try to ship everything once, see ECOPROFITABLE.COM “CLICK INFO” section. Objective to find the best solution to reduce shipping costs as much as possible.

You can also buy a scale to weigh your packages. So you can do everything from home: prepare the package and define the shipping rate.

WANT HELP: CONTACT US WITHOUT HESITATION.

ECOPROFITABLE.COM THANKS YOU FOR YOUR INTEREST. THIS IS HOW WE CONTRIBUTE TOGETHER TO PRESERVE THE ART OF NATURE, A SOURCE OF CULTURE, HOLIDAYS ETC.
